

FREQUENTLY ASKED QUESTIONS

1. Q. Under the new State law, public employees are mandated to contribute the greatest of three rates toward their health benefits. What are the three rates and how is each employee's rate determined?

A. The legislation that Gov. Chris Christie signed into law requires employees to pay the greatest of three rates:

- a. Those calculated according to the Chapter 78 mandate (P.L. 2011 C.78) (see charts below)
- b. Those calculated according to Chapter 2 (P.L. 2010 C.2) -- 1.5% of the annual pensionable base salary
- c. Flat-rate contribution as per contract or policy

All applicable rates will be compared to determine which is greatest. This rate will be the one the employee is required to pay. Under the law, the minimum rate to be contributed is 1.5% of the employee's base pensionable salary, including longevity. *Employee contribution rates and salaries will be tested every payroll period to ensure the highest rate is being paid.*

2. Q. On what salary is the calculation of the minimum 1.5% contribution based?

A. The calculation is based on the employee's base pensionable salary, including longevity. As an employee receives salary increases during the year, the amount of contribution will be adjusted upwards accordingly.

3. Q. What are the tables the State of New Jersey is using to determine the contribution rate as per Chapter 78?

A. The tables the State has prepared to illustrate the contributions are below.

Note: The following charts reflect the phase-in of contribution levels for employees employed on the contribution's effective date who will pay $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$ and the full amount of the contribution rate during the phase-in years.

To calculate your total percentage of premiums, combine both the medical plan premium percentage and, if applicable, the prescription drug plan premium percentage for the appropriate level of coverage.
